CONFERENCE OBJECTIVES

The thirteenth Arab Structural Engineering Conference (13th ASEC) is to be held in December 13-15, 2015, as a continuation to the previous successful twelve ones beginning with the first one in Egypt, 1985 passing respectively in Jordan, United Arab Emirates, Syria, Kuwait, Saudi Arabia and finishing with the twelfth one in Libya in 2013.

The Conference will continue to address issues involving advanced types and new trends of materials and structures. Contributions will highlight the latest developments in design and optimisation, within these areas. The main objectives of the conference are:

- Strengthening collaboration among universities, research centers and construction sectors in the Arab world.
- Exchanging and sharing professional skills among researchers and engineers in the Arab world,
- Addressing some of the industry challenges (housing, environmental issues, sustainability)
- Providing an international forum for information dissemination and discussions on research and practice related to construction industry.
- Forum exchange with the Arab scientists established in developed countries.

In addition to the conference sessions, an exhibition is to be held for new materials, new products and advanced equipment used in the construction industry.

MAIN TOPICS

1. Building materials

- a. Concrete technology and durability
- b. Low carbon, sustainable materials and novel concretes
- c. Use of waste or recycled products
- d. Hot weather concreting

2. Local and non conventional materials

- a. Earth
- b. Natural fibres
- c. Gypsum and lime

3. Modern trends in structural analysis

- a. Seismic design
- b. Modern methods (neural network,..)
- c. Steel structures
- d. Repair and strengthening
- e. Forensic engineering
- f. Fire resistance and blast loading

4. Bridge engineering and bridge maintenance and repair

5. Geotechnical engineering

6. Case studies for exceptional structures (tall structures, tunnels, dams, marine structures)

7. Construction management, precast concrete and housing

- a. Low cost housing
- b. Green buildings
- c. Construction techniques and precast concrete
